# GBF SentryLink
Smart Full IP Video Door Station for Multi-Tenant Buildings STK002

CUSTOMIZABLE ACCESS
Tenants can create virtual key codes for guests or delivery personnel using the GBF SentryLink App. Virtual key codes can be created with day or hour specific expiration times.

HIGH QUALITY VIDEO
Integrated dual-stream full-featured 1080P IP camera offers a 120-degree wide viewing angle with no optical distortion, ideal for viewing details at longer distances.

PREMIUM DESIGN
GBF SentryLink's solid build and clean appearance integrates seamlessly into any building design. Install as a standard surface-mount or flush-mount stand-alone door station, or install it with a contractor-created custom mounting to house the durable touchscreen. Each unit is backed by a 2 year manufacturer's warranty.

EASY INSTALLATION
The outdoor station requires only a power line, a RJ45 internet cable and a door unlocking wire. No wiring inside each apartment is needed, allowing significant savings on installation labor and costs.

Smart Access Control for 2-1000 Units Buildings

GBF SentryLink allows you to open and manage two different gates using smart phones, access codes, or RFID key fobs and keycards. Tenants can answer and view callers at your door from any location via a mobile iOS or Android device. 2-way live video and audio monitoring can be initiated from a mobile device even without pressing the bell button at the door station. Tenants can watch live video and snap a picture into their smart phone at anytime from anywhere. All gate activities are recorded into the GBF cloud server where tenants can access log files from their mobile device. Multiple devices can receive call notifications from the IP doorbell intercom at the same time, and multiple doorbells can be accessed together through GBF Sentrylink App.
Using GBF's web-browser based PMS (Property Management System), property administrators can edit tenant lists and room information remotely. PMS stores tracking logs, which include time stamp and video snapshots of doorbell, remote unlock, access code/key fob unlock, and virtual key/delivery PIN events, for 7 days.

Smart Full IP Video Door Station for Multi-Tenant Buildings STK002

Technical Specifications

System

Operating System	Embedded Android 5.1

Video — Color Image

Video Compression	H.264
Image Sensor	1/3" 2MP CMOS
Lens	3.6mm
Angle of View	D:120° H:90°

Audio — Support Dual-way Bidirectional talk

Audio Compression	G.711/AAC
Audio Input	Omnidirectional Mic
Audio Output	Built-in Speaker

Display

LCD Screen	10.1" TFT 1024*600

Operation Mode

Reader	MIFARE Card

Interface

Door Control IO	1

Network

Ethernet	10M/100Mbps
Network Protocol	TCP/IP

General

Ingress Protection	IP65
Tamper Switch	1
Installation	Surface or flush mounted
Material	Aluminum alloy and Tempered glass
Power	DC 12V
Power Consumption	Standby ≤1W, Work ≤10W
Working Temp.	-20°C~+60°C
Relative Humidity	10%~90%RH
Dimensions	10" X 14" X 2.5"
Package Dimensions	18.5" X 12.5" X 4"
Weight	5.0Kg
