

GBF SentryLink Smart Intercom For Multi Tenants

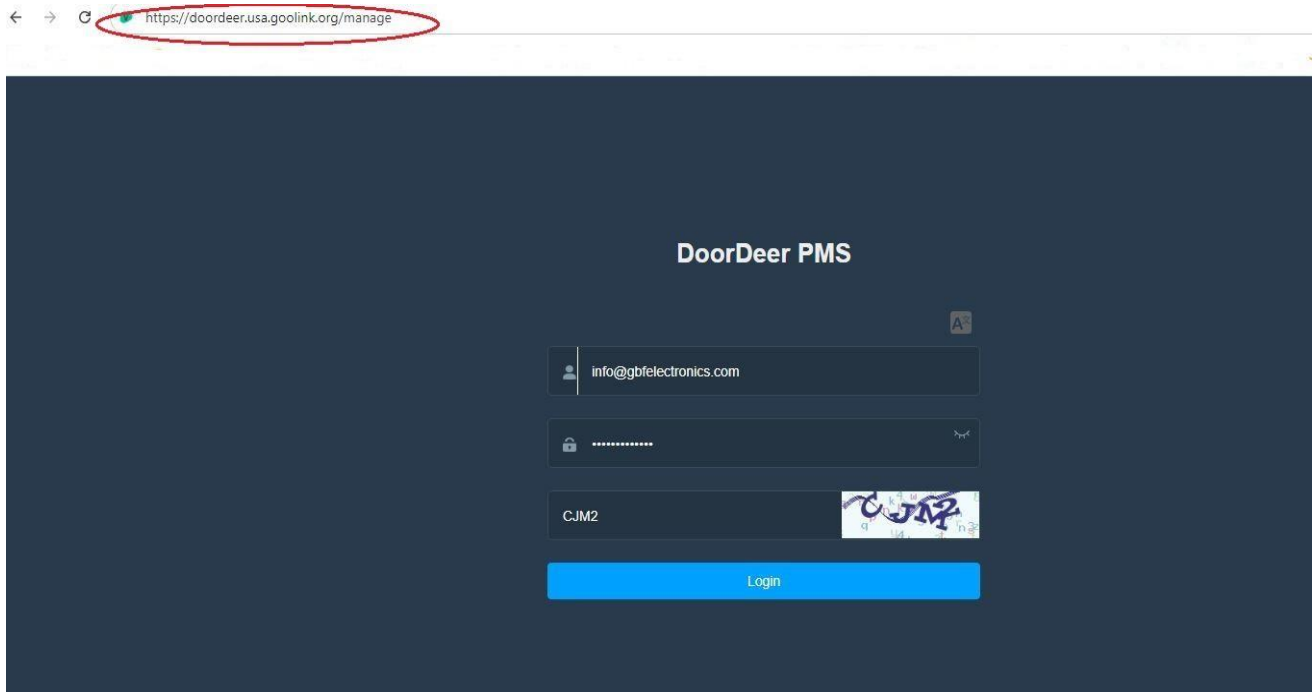

USER MANUAL

GBF™

Administrator/Property Manager Login Account:

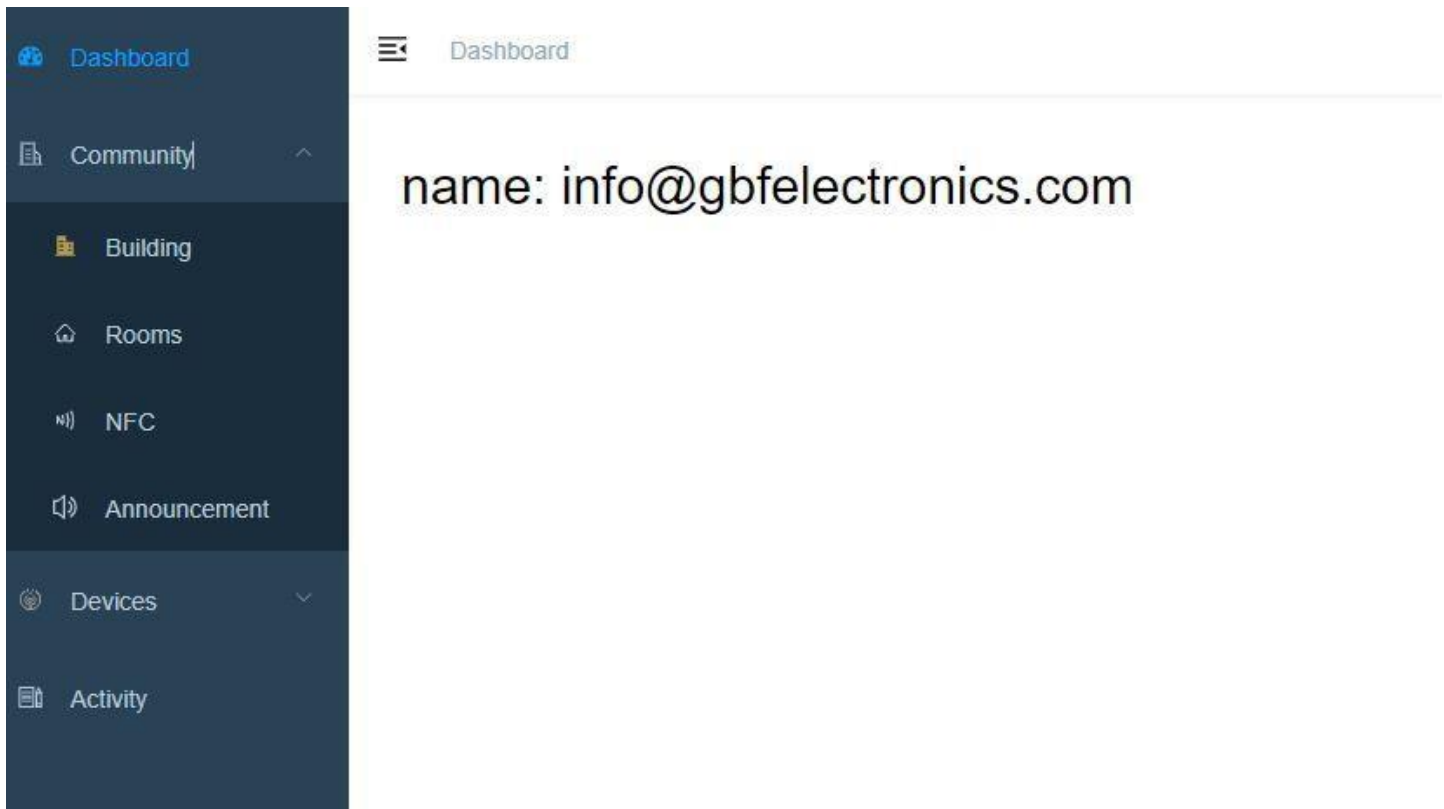

Initially, please supply the GBF support team at info@gbfelectronics.com with the name and email address that will be used for the system administrator/property manager login. In addition, please email us your device GID no. and the apartment building address, we will bind this device with your apartment on our system. After receiving an e-mail confirmation from the GBF support team, you may log in to the webpage at <https://doordeer-usa.goolink.org/manage> from which you will be able to add and manage all tenant and building information.

Property Manager Web Interface:

There are three main sections in the Dashboard Page:

- **Community**--- Including: Building, Room, NFC, and Announcement, etc.
 1. **Building**--- Includes all building information in your account.
 2. **Rooms**--- All rooms in each building, you could edit room and add the new room and delete the old room.
 3. **NFC**--- Use this section to manage all key fobs and key cards for this system.
 4. **Announcement**--- Add new announcements to all tenants, the system will automatically send announcements to tenants emails.

Building Information Page:

This section shows a summary list of all buildings under administrator/property manager account. You could add a new building and edit the existing building information.

Room Information Page: (Tenant directory)

This section shows a summary list of all rooms and tenants directory in all buildings under the administrator/property manager account. Click the 'new' icon to add a new room/new tenant entry.

You could edit or delete and reset tenant access code through this section.

The screenshot shows a web application interface for managing rooms and tenants. The browser address bar displays the URL: `doordeer.usa.goolink.org/manage/#/zonearea/rooms`. The left sidebar contains navigation options: Dashboard, Community, Building, Rooms (highlighted with a red circle), NFC, Announcement, Devices, and Activity. The main content area shows a breadcrumb trail: Dashboard / Community / Rooms. Below the breadcrumb is a search and filter section with dropdown menus for Building Name, Account, Unit Name, and Status, a Search button, and a New button (highlighted with a red circle). The main table lists room information with columns for ID, Unit Name, Email, Building, Floor NO., Status, Expiration, and Operation. The Operation column contains Edit, Delete, and Code Reset buttons for each row. The first row's buttons are highlighted with red circles.

Edit Room Information Page:

In this section, administrators/property managers can create master tenant accounts and suite numbers stored to the cloud database, forming the directory on the outdoor station. Each tenant will use their email address as the username for their account, which they will also use to log in to their Doordeer APP to access the intercom system. Optionally, after creating and submitting the master account/suite, you may return to edit the name that will be displayed on the outdoor station. Once the entry is submitted, it is pushed to the outdoor station by the servers, which may take up to 10 minutes.

NFC Page:

This section shows a summary of all RFID access keycards or keyfobs for all buildings managed by this administrator/property manager account. The list can be filtered by building, unit number, and NFC serial number. Click the 'Add' icon to add a new RFID entry. Select an entry first if you wish to edit or delete a line entry. Full or filtered lists can be exported in a .csv or .xls file format, or printed directly.

The screenshot shows a web application interface for managing NFC access. The browser address bar is `doordeer.usa.goolink.org/manage/#/zonearea/nfc`. The page title is "Dashboard / Community / NFC".

At the top, there are search filters for "Building Name" (set to "nfc"), "Account", and "Unit Name", along with a "Search" button and a "New" button (circled in red).

The main content is a table with the following columns: ID, NFC, account, unit_label, Building, zone, AddTime, and Operation. The "Operation" column contains "Edit" and "Delete" buttons for each row. The "Edit" button for the first row (ID 3196) is circled in red.

The left sidebar contains a navigation menu with the following items: Dashboard, Community, Building, Rooms, NFC (circled in red), Announcement, Devices, and Activity.

Add/Edit NFC Info Page:

In this Section, administrators/property managers can add RFID keycard or keyfob access by entering the serial number of the RFID tag, and assigning each to a unit number. Any number of RFID tags can be assigned to an individual suite. Once the entry is submitted, it is pushed to the outdoor station by the servers, which may take up to 10 minutes.

Activity Page:

In this section, administrators/property managers can recall daily SentryLink event history and screenshots for each activity, including time-stamped unlock events and answered/missed calls. The results can be filtered by building, unit number, and any one of six event types; Call, Answer, Virtual key unlock, manual unlock (master account PIN entered at door station), remote fixed password unlock (unlock using the app), and NFC. Full or filtered lists can be exported in a .csv or .xls file format, or printed directly.

The screenshot displays the SentryLink Activity Page interface. On the left is a dark sidebar with navigation options: Dashboard, Community, Devices, Apt. Intercom, Elevator Controller, and Activity (highlighted with a red circle). The main content area has a breadcrumb 'Dashboard / Events / Activity' and a search bar with filters for Start Time, End Time, Building Na, Unit Name, Account, NFC, Unlock Cod, and Activity Type. Below the filters is a table of activity events. The 'Activity Type' column header and the 'Media' column header are circled in red. The table contains three rows of data, each with a corresponding screenshot in the Media column, also circled in red.
